

Operational update, progress on proposed acquisition of Kenai and appointment of new Director

Serabi Gold plc (AIM: SRB, TSX:SBI), the Brazilian focused gold mining and exploration company announces a further operational update on its Palito gold mine, an update on the proposed acquisition of Kenai Resources ("Kenai") and the appointment of a new non-executive director.

Operational Update

The Company is continuing to make good progress with the development and start-up of gold mining operations at its wholly owned high-grade Palito gold mine, located in Para state, Brazil.

Highlights:

- Development mining now underway
- Ore production from remnant ore blocks underway
- Development ore stockpile now being generated
- Two main ventilation raises to surface have been started
- Reassembly of the primary crushing circuit due for completion by end of the second quarter, 2013
- Remediation of flotation circuit due to be completed by end of the second quarter, 2013
- Detailed engineering of the milling circuit complete and disassembly and reassembly of the old plant well underway
- Initial mining fleet on site in February 2013 with further items expected to be commissioned at start of third quarter 2013
- Plant commissioning remains on schedule

With the arrival of an experienced mine management and technical team during the first quarter, the Company has focused on rehabilitation and underground operational mining activities at the Palito Mine, which included reinstatement of the underground mine services before mine development could commence. Work on the main ramp and gallery development started during this month.

The additional mine mobile fleet ordered late last year will begin to arrive at site in the next month, and by end July 2013, the Company expects to have two new drilling jumbos and three new underground loaders delivered to site.

An ore development stockpile is now being generated, which will continue to increase as the plant remediation continues throughout this year. By year end, when the commissioning of the plant is scheduled to commence, the Company anticipates having an ore stock in excess of two months' worth of plant feed.

In parallel with the progress on the development of the underground mine, work on the remediation of the process plant is underway. The crushing and flotation plants, having been dismantled and critical parts overhauled, are now both being reassembled with a view to completion during the second quarter of 2013. Icone, an Engineering firm based in Belo Horizonte, has spent the past two months designing the overhaul of the grinding section, which will now include the facility to introduce a gravity circuit. The old milling section is now disassembled and work has begun on the ball mill overhaul. The ball mill will undergo on-site remediation, and orders have been placed for the mill infrastructure,

The camp – a new pre-fabricated accommodation unit - is being assembled and should be operational by the end of May. It means the upgraded camp will provide living facilities for 140 personnel. With the Fly-in and Fly-out (FIFO) roster, and approximately 25 per cent of the workforce living offsite, this will comfortably satisfy the Company's needs.

Update on the Kenai Transaction

Following the announcement of the proposed business combination between Serabi and Kenai on May 6, 2013 ("the Transaction"), the Company advises that Kenai has set the date of July 5, 2013 for its shareholder meeting to consider the Transaction.

Mike Hodgson CEO said *"At Palito the good start we made to the year with the early dewatering of the mine, has been maintained through securing key operators, management and equipment to site. I am pleased to see mine development now underway some two months ahead of plan."*

PRESS RELEASE 13 MAY 2013
SERABI GOLD plc ("Serabi" or "the Company")

The plant remediation is also progressing well and we hope to report that the crushing and flotation plants will both be completed by the end of the second quarter of 2013, which means we are on time and budget to commence production at the end of the year.

This news along with our recent announcement to acquire Kenai and the Sao Chico asset is very satisfactory to say the least. Being able to accommodate the requirements for the processing of Sao Chico ore into the plant design as we remediate the processing facility is very timely indeed."

Appointment of New Director

The Company is pleased to announce the appointment of Mr. Nicolas Bañados as a Non-executive Director of the Company with immediate effect. The appointment of Mr Bañados is in line with the subscription arrangements concluded with Fratelli Investments Limited in January 2013 and he becomes the second representative of Fratelli to join the board of Directors of the Company.

Mr Bañados, aged 36, is an attorney-in-fact of Fratelli Investments. Mr Bañados graduated from the Catholic University of Chile in 2000 and from 2001 until 2003 he was an investment analyst of the Research Department at Consorcio Vida Life Insurance Company. In 2003 Mr Bañados joined Fratelli Investments, and its non-discretionary fund manager, Megeve Investments, as Portfolio Manager. Between 2005 and 2007 he completed an MBA at The Wharton School, University of Pennsylvania, United States. Following completion of his MBA, Nicolas Bañados re-joined Fratelli Investments and Megeve Investments, as Vice President and subsequently as Managing Director of Private Equity

PRESS RELEASE 13 MAY 2013
SERABI GOLD plc ("Serabi" or "the Company")

Forward-looking statements

Certain statements in this announcement are, or may be deemed to be, forward looking statements. Forward looking statements are identified by their use of terms and phrases such as "believe", "could", "should" "envisage", "estimate", "intend", "may", "plan", "will" or the negative of those, variations or comparable expressions, including references to assumptions. These forward looking statements are not based on historical facts but rather on the Directors' current expectations and assumptions regarding the Company's future growth, results of operations, performance, future capital and other expenditures (including the amount, nature and sources of funding thereof), competitive advantages, business prospects and opportunities. Such forward looking statements reflect the Directors' current beliefs and assumptions and are based on information currently available to the Directors. A number of factors could cause actual results to differ materially from the results discussed in the forward looking statements including risks associated with vulnerability to general economic and business conditions, competition, environmental and other regulatory changes, actions by governmental authorities, the availability of capital markets, reliance on key personnel, uninsured and underinsured losses and other factors, many of which are beyond the control of the Company. Although any forward looking statements contained in this announcement are based upon what the Directors believe to be

reasonable assumptions, the Company cannot assure investors that actual results will be consistent with such forward looking statements.

Qualified Persons Statement

The scientific and technical information contained within this announcement has been reviewed and approved by Michael Hodgson, a Director of the Company. Mr Hodgson is an Economic Geologist by training with over 25 years' experience in the mining industry. He holds a BSc (Hons) Geology, University of London, a MSc Mining Geology, University of Leicester and is a Fellow of the Institute of Materials, Minerals and Mining and a Chartered Engineer of the Engineering Council of UK, recognizing him as both a Qualified Person for the purposes of Canadian National Instrument 43-101 and by the AIM Guidance Note on Mining and Oil & Gas Companies dated June 2009.

Neither the Toronto Stock Exchange, nor any other securities regulatory authority, has approved or disapproved of the contents of this news release.
